Stichting Kinderopvang
Haarlemmermeer

Pre-school, the best place for your child

**Playing is discovering, experiencing, learning and experimenting.
Your toddler is welcome in its own group. We offer your toddler
challenging activities based on themes. This way, we stimulate the
curiosity and the fantasy of your child.**

**Toddlers learn to interact, to grow independent and, above all, to have fun
playing with other children. All activities are in line with the age, needs,
interests, and the perception of your child. Your toddler develops
self confidence so he or she is prepared for primary school.**

Pre-school Education & Pre-school Academy

Pre-school Education is available for children who need additional support in learning the Dutch language. Our professional team of tutors work as special education supervisors. In a few pre-schools we offer not only education in the Dutch language but also support for the English language. For children, who are faster in their development, we have an additional service called Pre-school Academy. We offer extra support and challenges, to develop their full potential.

Do you have any questions? We are happy to help and advise you!
